

Ports, Services and Logistics

OCCUPATIONAL HEALTH AND SAFETY POLICY

Busserk is cooperation that carries out port operations of maritime transportation according to the local and international regulations and terms as well as providing logistics and warehousing services.

Our company believes that providing a secure environment for its personnel and reducing the security risks are necessary to increase productivity and required by laws. Through Occupations Health and Safety (OHS) Management System, it is reviewed periodically and performance is monitored to sustain continuous improvement.

For this reason;

- All local and national laws, regulations and standards regarding Occupational Health and Safety issues are followed and acted according to the accepted recommendations of customers and all common work groups,
- All risks regarding injuries, occupational illnesses, Occupational Health and Safety issues are assessed and preventive measures are taken,
- New services, newly established equipment and new procedures are assessed regarding Occupational illnesses and their effects on Occupational Health and Safety during the processing stage,
- Contribution of all personnel into the system is aimed in order to inhibit the risks at its source to maintain zero occupational accidents and illnesses,
- Systems to minimize the possible loss in case of any accidents or emergencies that may occur during our activities are developed,
- Personnel are trained on occupational health and safety to achieve success and for continuous improvement.

Each manager is responsible to take the necessary actions and execute them regarding own operations.

All our personnel will take the necessary precautions and collaborate in order to achieve these objectives, and will create a culture open for continuous improvement.
